Dynasylan® 1189 in adhesives and sealant applications

Secondary aminosilane, with trimethoxysilyl function

Aliphatic butyl group avoids yellowing, and improves stability of urea group

Coupling agent / adhesion promoter/ for (filled) polymers (e.g. polyamides)

Dynasylan[®] 1189

• STPU

 STPE/MS-Polymers

• PU

• Silicones

• EP

(Co)-Adhesion promoter for highly elastic products High efficient endcapper for NCO group modification

Suitable STPU binders to achieve - for both adhesives and sealants

High purity, no undesired side reactions / crosslinking
