Evonik’s Dynasylan® products for electronic adhesives

High-efficient adhesion promoter for EP, AC, PU and CA adhesives, coupling agent of choice for epoxy moulding compounds (EMC)

Dynasylan® GLYMO

Chemically neutral, low volatile adhesion promoter with high affinities for metals and plastics for EP, PU and AC adhesives

Dynasylan® silanes improve adhesives & EMC (Epoxy Moulding Compounds) for diverse electronic applications

VPS 7163

Dynasylan® 1146

Low VOC silane oligomer adhesion promoter for EP and silicone adhesives. No labelling required!

Dynasylan® MEMO

Dynasylan® 6490

Low volatile, low VOC silane oligomer with multiple vinyl groups as adhesion promoter for RTV-2 silicone adhesives

Dynasylan® VTMO

Adhesion promoter and RTV-2 silicone adhesives for CA

Legend:
- AC = Acrylate
- CA = Cyanoacrylate
- EP = Epoxy
- PU = Polyurethane
