Dynasylan® silanes in STPU
Products and technologies

Evonik’s products for STPU adhesives and sealants

- **Dynasylan® SIVO 202**
  - Special adhesion promoters with broad adhesion spectrum

- **VPS 7163**
  - Low volatile co-adhesion promoter for metals and plastics with high crosslinking possibility

- **VPS SIVO 260**
  - New adhesion promoter for difficult to adhere plastics, especially PC, PMMA and metals

- **VPS SIVO 280**
  - Traditional aminofunctional adhesion promoters for standard substrates

- **Dynasylan® 1146**
  - Special/Superior less yellowing adhesion promoter for glass, metals and diverse plastics → no labeling

- **Dynasylan® VTMO**
  - Moisture scavanger to enable the formulation of storage stable STPU systems

- **Dynasylan® SIVO 203**
  - Special adhesion promoters to increase elasticity and superior reduction of yellowing

- **Dynasylan® TRIAMO AMMO DAMO-T**
  - Special adhesion promoters to increase elasticity with 1189 or modulus with 1124

- **Dynasylan® SIVO 202**
  - Special/Superior less yellowing adhesion promoter for glass, metals and diverse plastics → no labeling

- **Dynasylan® SIVO 203**
  - Special adhesion promoters to increase elasticity and superior reduction of yellowing
