Evonik’s Dynasylan® Products for Epoxy-Based Adhesives

Dynasylan® GLYMO

- High-efficient adhesion promoter of choice for many epoxy applications, coupling agent for epoxy moulding compounds (EMC)

Dynasylan® GLYEO

- Ethoxy-based adhesion promoter for slower hydrolysis, and for hot curable products

Dynasylan® silanes improve adhesion and mechanical properties in epoxy-based adhesives

Dynasylan® AMMO AMEO SIVO 214

- Primary aminosilanes or multifunctional aminosilane systems (SIVO 214) as additional adhesion promoters for 2K products, to be formulated in the hardener

VPS 7163

- Chemically neutral, low volatile adhesion promoter with high affinities to metals and plastics for epoxy adhesives

Dynasylan® 1146

- Unique silane oligomer to impart tailor-made features in the epoxy networks such as hydrophobicity and flexibility… for 2K products only!
